

PDF LAYOUT RECONSTRUCTION TEST

Two columns, a ruled table, an image, and common fonts

LEFT COLUMN

The first column begins with sentinel L-101.
Its lines are deliberately short and separate.
Reading order should finish here before R-201.
The source uses embedded Helvetica text.

RIGHT COLUMN

The second column begins with sentinel R-201.
A fixed PDF stores text at page coordinates.
DOCX reconstruction must infer paragraphs.
The visible order is left, then right.

Test item	Expected	Marker
Column order	Left to right	T - 01
Table cells	3 x 4 grid	T - 02
Image	One raster	T - 03

IMAGE CAPTION

One 1600 x 1067 raster image sits beside this text.
Marker IMG-303 checks whether the image remains present.
The final marker on this page is END-PAGE-ONE.

LANDSCAPE PAGE CONTROL

Page two is landscape and contains a wide four-column matrix.
